

A Place to Be, Explore and Grow

Our vision is for all children to engage in a welcoming, inclusive, and flexible play-based learning environment, which promotes connections to the natural world.

We Value

- Time for children to be, and to make meaning of their world through their play.
- An enriched, play based, learning environment where all children can develop dispositions for learning such as being curious, confident, a communicator, resourceful, cooperative, purposeful and persistent, and a risk taker.
- Opportunities for children to understand Australia's cultural diversity. Recognising the importance of being inclusive and respectfully valuing multicultural perspectives.
- A flexible learning environment and curriculum that meets the needs of every child, family, and the community.

We recognise

- That all children have a right to play.
- That children are active participants in their learning, have individual strengths and abilities, and are competent and capable learners.
- That children need opportunities to connect to the natural world, fostering an understanding and respect of the natural environment.
- That the learning dispositions we value will prepare our children for lifelong learning.
- The importance of engaging in reflective practices to provide quality teaching and learning.

We will

- Provide an environment where children feel safe, secure and supported to grow in confidence to explore, learn, and develop a strong sense of wellbeing.
- Encourage sustainable practices into our curriculum to highlight our responsibilities to care for the environment and provide for a sustainable future.
- Work in partnership and establish respectful relationships with families to foster a learning culture.
- Build upon the range of language, literacy, numeracy, science, and arts experiences that children, families, educators and the wider community bring with them to kindergarten.
- Encourage a growth mindset for successful learning.
